Lab 01

Análise dos Resultados

1- Sistemas populares são maduros/antigos?

Análise de Mediana

- Encontrou-se uma mediana de idade de 8,28 anos para os 1000 repositórios mais populares do GitHub.
- O conceito de `antigo' é bastante relativo.
- Mas, na minha opinião, pode-se dizer que 8 anos é, sim, um projeto maduro.

Siml

Repositorios populares são maduros.

Porém..

• DENTRE os repositórios mais populares do GitHub, não necessariamente os mais antigos são os mais populares.

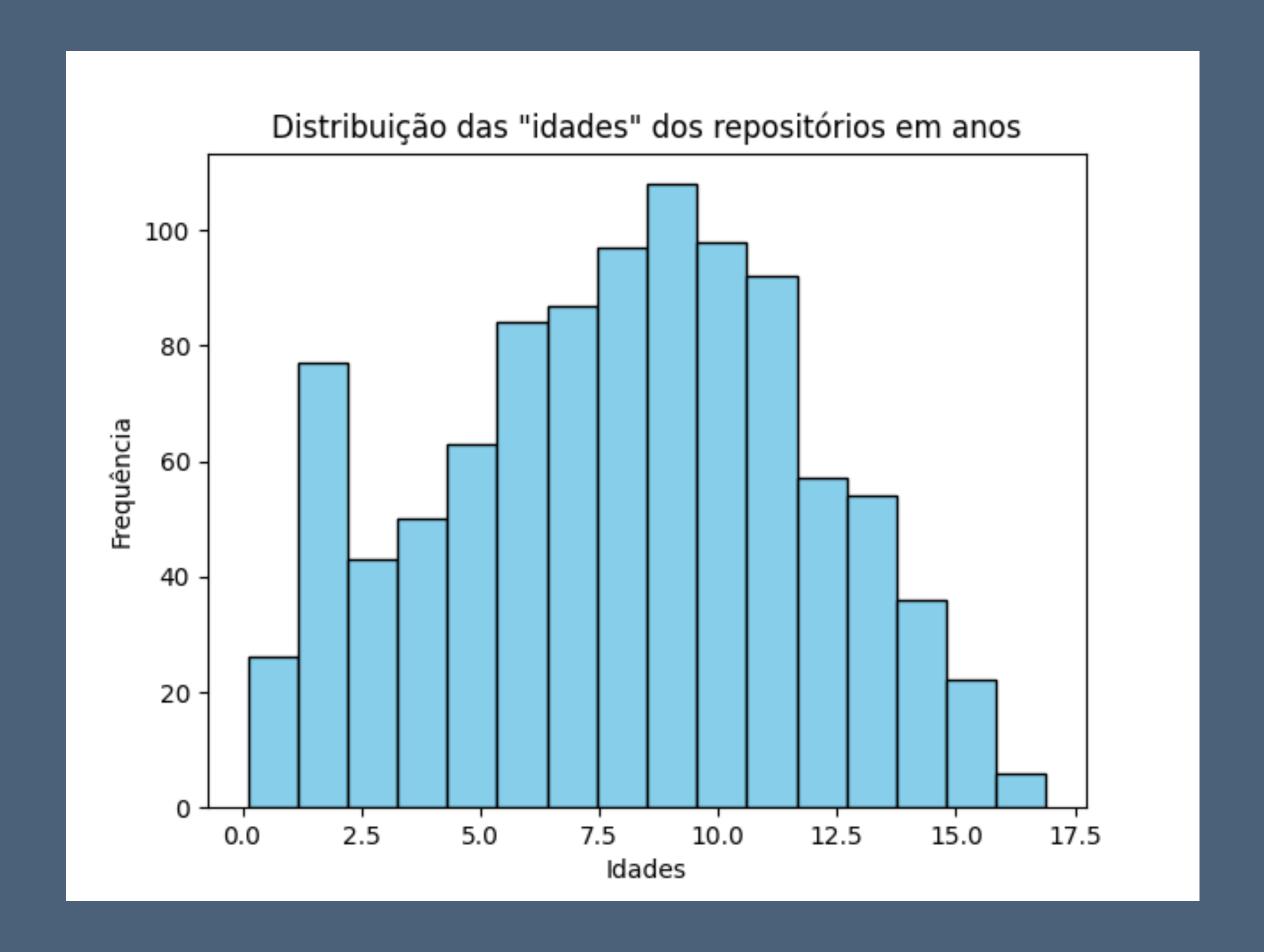

Gráfico 1

- Observa-se que uma parte considerável da área da curva de distribuição está mais à esquerda.
- Logo, a maior parte dos 1000 repositórios mais populares não está entre os mais antigos.

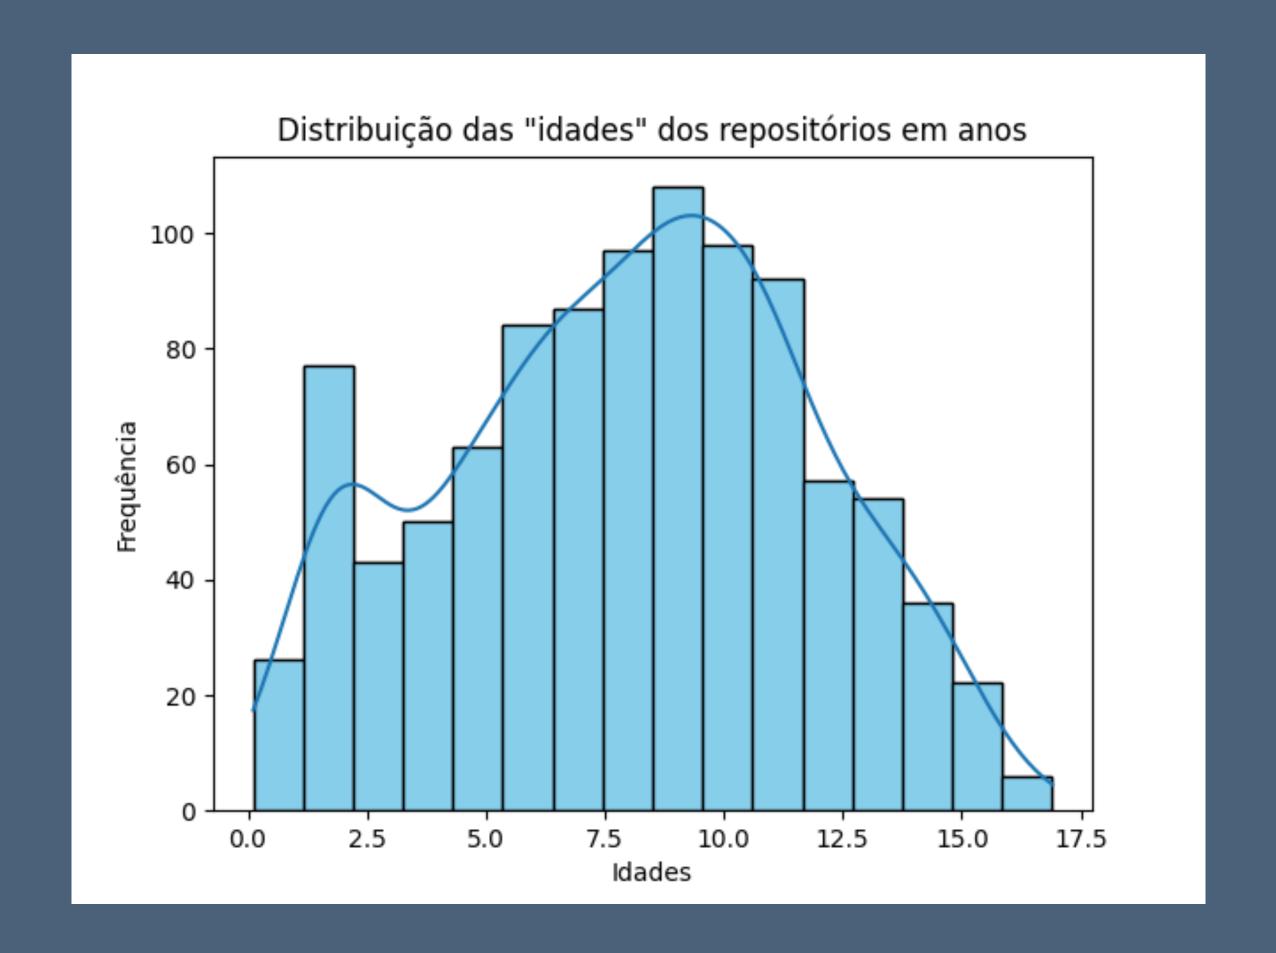

Gráfico 2

- A distribuição é quase simétrica
- 75% dos repositórios possuem até 10 anos de idade.
- 25% dos repositórios possuem mais de 10 anos de idade.

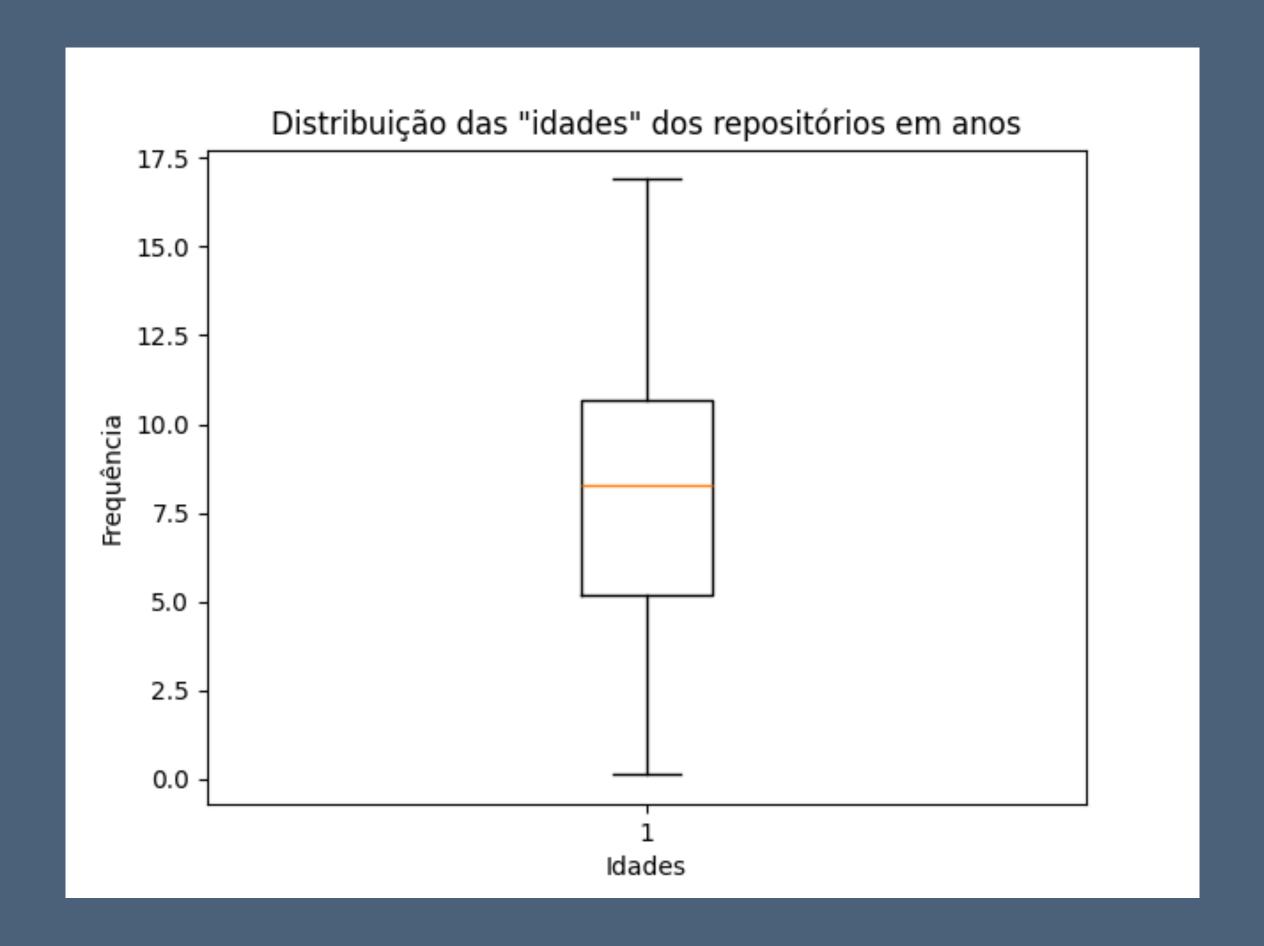

Gráfico 3

2- Projetos populares recebem muita contribuição externa?

Análise de Mediana

- Encontrou-se uma mediana de 629 pull requests aceitos para os 100 repositórios mais populares do GitHub.
- Métrica um pouco difícil de se analisar sem outras medidas, como a relação com o tempo de existência do repositório.
- Apesar disso, pode-se dizer que é um número expressivo.
- Assim,

DEBUG CONSOLE

Sim! Repositórios populares recebem muita contribuição externa.

Será?

- Alguns repositórios possuem de 10 mil a 80 mil pull requests aceitas no total.
- Ainda pode-se dizer que 629 é um número expressivo?
- Nem tanto...

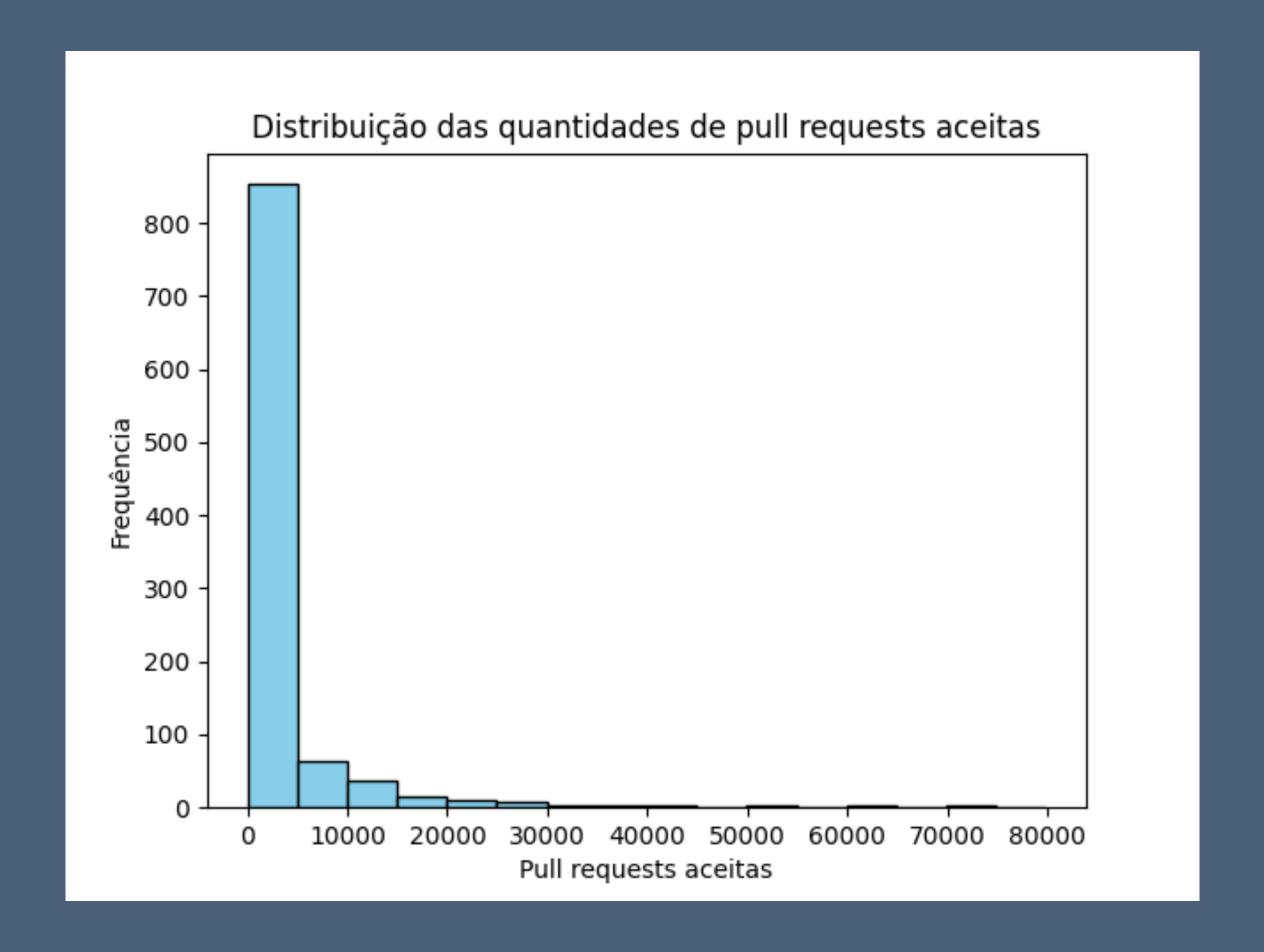

Gráfico 4

3- Sistemas populares lançam releases com frequência?

Análise de Mediana

- Encontrou-se uma mediana 33 releases totais para os 1000 repositórios mais populares.
- Trata-se de um valor bem baixo
- Mas não apenas

Gráfico 6 Gráfico 7

Interpretação

- Dos 1000 repositórios analisados, 313 (31,3%) nunca lançaram nenhuma release.
- Provavelmente, estes repositórios não "oficializam" o lançamento de atualizações por meio de releases oficiais.

4- Sistemas populares são atualizados com frequência?

Análise de Mediana e distribuição

- Encontrou-se uma mediana de 45 dias desde o último lançamento de uma atualização para os 1000 repositórios mais populares do GitHub.
- Analisando os modelos de distribuição, percebe-se uma tendência de poucos dias desde última atualização

5- Sistemas populares são escritos nas linguagens mais populares?

Análise dos resultados

- 78,8% têm como linguagem principal uma das linguagens do top-10 linguagens mais utilizadas do GitHub (ranking 2025).
- Essa análise é mais fácil...

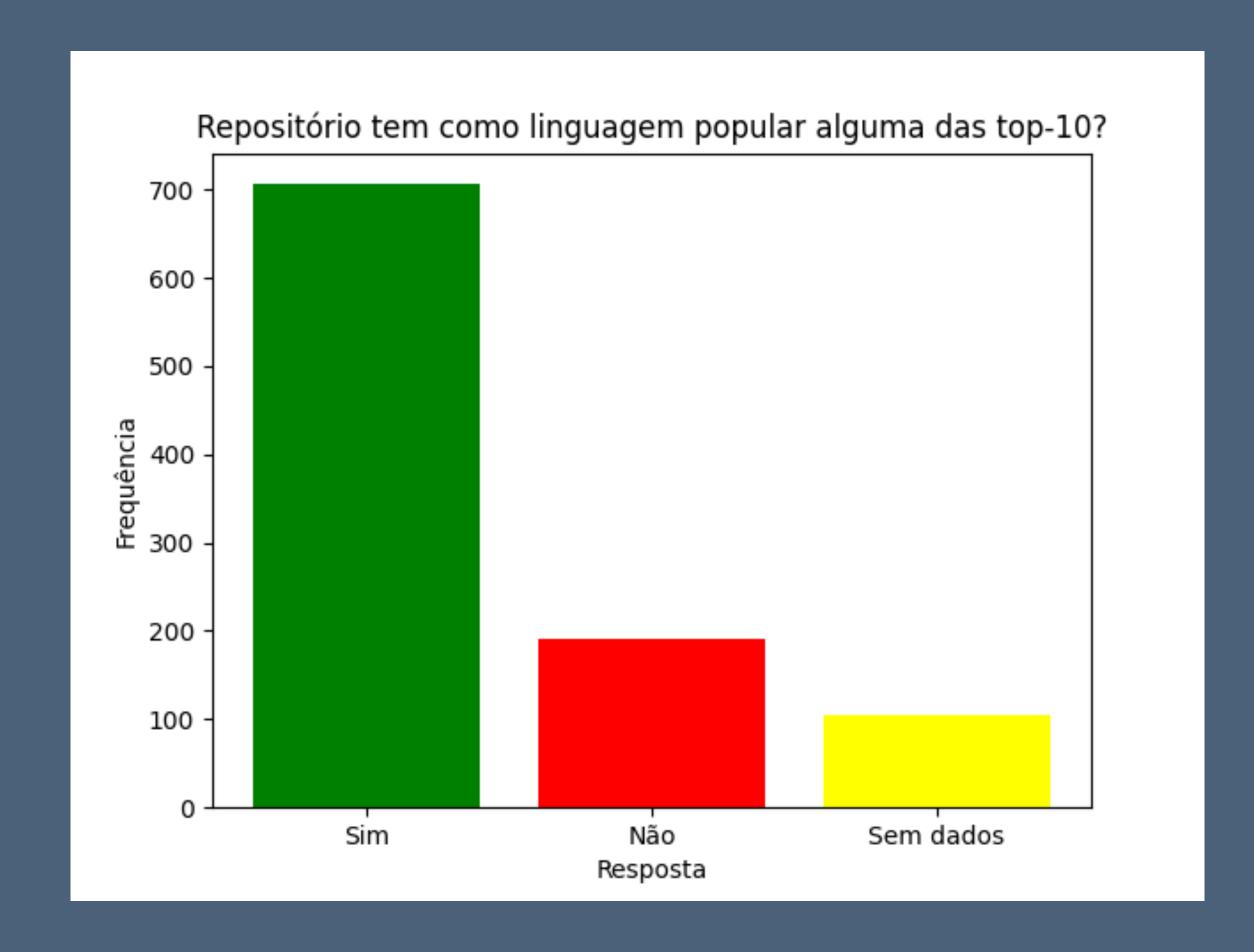

Gráfico 11

6- Sistemas populares possuem um alto percentual de issues fechadas?

Análise de mediana e distribuição

- A mediana da razão entre issues fechadas e issues abertas para os 1000 repositórios mais populares do GitHub foi de 86,57%.
- Observa-se, no diagrama de dispersão, a forte tendência de que muitos repositórios tenham um percentual elevado de issues fechadas.
